

Flowerland Featured Plant

Forsythia *Forsythia spp.*

Forsythia is a beautiful flowering, deciduous shrub. Forsythia prefers full sun and well-drained soil. They are prized for their early

blooms and use for borders and erosion control.

Forsythia may be left to grow naturally or trimmed into a hedge.

They are very easy to care for and will only need watering during extended dry periods once established. There are also several dwarf varieties available-call for availability.

Ht: 6-8 ft Sp: 5-8 ft

Full Sun.
