

Ostrich Fern

Matteuccia struthiopteris

The Ostrich fern is a beautiful addition to any wooded or shady garden. This perennial fern

prefers a shaded part of the garden where it will be protected from wind and hail. Prefers moist soil. A great choice for borders and as a naturalizer with wildflowers. Young fronds known as 'fiddleheads' are often harvested and eaten after being cleaned and well cooked.

Ht: 3-6'

Shade to Partial Shade.
