## Peony

*Paeonia spp.*

The peony is a herbaceous perennial plant with large fragrant flowers that bloom late spring. Peonies prefer rich

well-drained and well-aerated soil in partial to full sun. Peonies can live up to 100 years, and will need staking to ensure plant health. Remove foliage to 3" from ground after first frost. Cut flower. Not deer resistant. Transplant in fall.

Ht: varied to 38" in bush form

Partial to full sun.

Available mid-spring.
