## Eastern Redbud *Cercis Canadensis*

The Eastern Redbud is a spring flowering deciduous tree. The Redbud has heart-shaped leaves and long seedpods and yellow foliage in the fall. These relatively small trees are perfect as specimens, and borders in naturalized areas. Redbuds are salt tolerant, so may be in roadside plantings.

Ht: 20-30' at maturity. Sp: 15-30'  
Full to partial sun.  
Deer Resistant.  
Available early spring.
