

Lucifer African Lily

“Lucifer’ is easy to grow and thrives in organically rich slightly moist soils. This Crocosmia will amaze you with its lovely light-to-medium-green vertically oriented iris-like foliage and horizontal chains of rich scarlet-red, hummingbird attracting, nodding, gladiolus-like mid-summer-borne blossoms.

Specifics:

- Perennial
- Full sun to light shade
- Blooms July through August
- Plant size: 3’ with slow spreading habit
- Bulbous offsets will not get out of bounds
- Attracts hummingbirds
